Eliminate Sciatica And Back Pain Without The Scars and Expense of Back Surgery

If you’re over the age of 35 and suffer from the following...

- **Sciatica**
- Disc herniations
- Lower back pain
- Numbness in the legs and feet
- Radiating hip pain

...there may be hope. Now, a local doctor has what may be the most important treatment in helping these conditions.

Finally, there’s a treatment to conquer back and leg pain without dangerous medications or painful surgery. Nothing’s worse than feeling great mentally, but physically feeling held back from life because you hurt and the pain just won’t go away!

Sure, you can numb the pain if you take enough Vicodin, Soma or some other pill. But the real problem is while you make it through the day all “numbed up”, you are likely making your problem even worse...without knowing it.

“A new back treatment is proving to be 70-80% successful in helping patients enjoy life again”

No matter where you are with back pain, whether you’re having unrelenting sciatic pain and facing surgery or you just injured it yesterday, a treatment called non-surgical spinal decompression may be the answer for you.

**“How Do I Know If This Really Works?”**

While non-surgical spinal decompression is the ‘new kid on the block’ when it comes to back pain treatment, there is plenty of research to back up its claims. Here’s just a handful...

“We thus submit that decompression therapy should be considered first, before the patient undergoes a surgical procedure which permanently alters the anatomy and function of the affected lumbar spine segment.”

- **Journal of Neuroscience Research**
- 86% of the 219 patients who completed the therapy reported immediate resolution of symptoms

- **Orthopedic Technology Review**

“Vertebral axial [spinal] decompression was successful in 71% of the 778 cases”

- **Journal of Neurological Research**

“good to excellent” relief in 86% patients with Herniated discs”

- **The American Journal of Pain Management**

“decompression therapy reported a 76.5% with complete remission and 19.6% with partial remission of pain and disability”

- **Rio Grande Hospital, Department of Neurosurgery**

“It was hard to walk and sit for long periods without pain in right leg - Got in and out of my car. I was a 10 out of 10 pain level. After about six treatments the numbness and burning feeling was gone in my right leg.”

- **Stanley McKee, Maintenance, Seven Hills**

As you can see, spinal decompression has a high success rate with helping disc herniations, pinched nerves, and severe pain. In just a matter of weeks you could be back on the golf course, enjoying your love life, or traveling again.

Spinal decompression treatments are very gentle. In fact, every once and awhile I even catch a patient sleeping during sessions. Most patients feel better with just a few treatments, and best of all there will be...

**No Dangerous Drugs, No Invasive Procedures, And No Painful Exercises.**

You’ll simply lie on your back, resting your head on a comfortable pillow. We’ll set the computer to focus on your problem area – then the advanced computer system will do the rest.

My name is Dr. Patrick McCluskey, Chiropractic Physician, and owner of Timber Ridge Neck & Back Pain Clinic in North Royalton. I understand what it feels like to live in pain, because I see it every day.

I’ve seen hundreds of people with back pain, numbness, and sciatica leave the office pain free. This is why for the first 15 callers only, I’m running a very special offer where you can find out if you are a candidate for spinal decompression.

**‘37 For Sciatica And Back Pain Sufferers**

What does this offer include? Everything I normally do in my new patient evaluation for $37. Just call and here’s what you’ll get...

- An in-depth consultation about your health and well-being where I will listen...really listen...to the details of your case.
- A detailed neuromuscular examination.
- A full set of specialized x-rays to determine if a spinal problem is contributing to your pain or symptoms.
- A thorough analysis of your exam, x-ray, and MRI findings so we can start mapping out your plan to being pain free.
- And, if you qualify, you’ll get Three (3) Free Spinal Decompression Sessions, You’ll get to see everything first hand and find out if this amazing treatment will be your pain solution.

- **Sciatia – pain radiating from the low back and buttocks down through the leg.**

No matter the specific type of pain you’re experiencing, I can help you tackle it using the latest non-surgical spinal decompression techniques. My goal is to get you back to living your life to the fullest. Now, call today and experience the difference for yourself.
